EXPERIENCE

Verizon, New York, NY — *Software Engineer II*

January 2021 - PRESENT

Assigned to the digital sales team tasked with building fresh, newly designed UX/UI and optimizing run time for the customer-facing web application implementing SSR, which led to increased customer follow-through and purchase rate by 37%.

Collaborated with other teams in the e-commerce space to generate reusable React components to increase code readability and sustainability.

Sanity-tested passive QA environments on customer flow to ensure flawless online shopping experience, reporting, and fixing any inconveniences within the UI or logic along the way.

Provided code reviews for other product team members and supplied feedback to build scalable code.

HungerSwipe, Remote — *Junior Software Developer*

December 2020 - May 2021

Developed a mobile application for a food-tech startup.

Collaborated with stakeholders, UX designers, as well as other engineers to deliver a fine-tuned application.

Tested software for bugs and run time for optimizing performance.
